## Green Gardening

WITH MEDINA PRODUCTS

### SPRING/FALL

#### MEDINA SOIL ACTIVATOR

is great for preparing a garden or for getting the life back in your soil. It loosens soil, aids in water absorption and retention, recycles nutrients, and balances soil pH. Use with Medina Molasses. Apply twice yearly—spring and fall.

**MEDINA PLUS** adds seaweed extracts to Medina Soil activator. Seaweed has natural hormones that encourage root growth and fruiting/blooming. Use Medina Plus on your yard, garden, and flowers. Use with Medina Molasses. Apply twice yearly—spring and fall.

**MEDINA MOLASSES** is a natural fuel source for the microbes in Medina products. When molasses is used with the other products, they wake up quicker and produce faster results. Apply twice yearly—spring and fall.

**GROWIN' GREEN** granular organic fertilizer is the best choice for lawn and garden fertilization. 40 pounds covers 3,000 sq. ft. and feeds for 3-4 months! Organic fertilizers are better utilized by plants and lawns, and produce more stable/consistent growth as compared with synthetic fertilizers. Apply year-round for the perfect lawn: spring and summer to feed, and fall to winterize.

**HASTAGRO PLANT & HASTAGRO LAWN FERTILIZERS** are fantastic all-in-one natural fertilizers that can be used all growing season. HastaGro Lawn is used monthly to add the extra pop your lawn needs. HastaGro Plant can be used twice monthly on all flowers and vegetables to produce more blooms and harvest.

**MEDINA ORANGE OIL** has many applications. Ask your garden care expert for details. We market it as a super-concentrated cleaner. One quart makes 64 quarts of all purpose cleaning solution.
