

SEPTIC TANKS, CESSPOOLS AND

DRAIN FIELDS: For every 4 people using the system, flush 1 quart of Actina down any drain leading to the tank. Add 1 pint one week later, then 1 cup each month for preventive maintenance. This low-cost preventive maintenance program may help to preserve the useful life of your septic system and reduce the need to pump out solids. When you consider the high cost of replacing part or all of your septic system, a small investment in Actina now could show significant savings later.

ODOR CONTROL: Use 1/4 cup of Actina to reduce odors in garbage disposals, drain pipes, or other odor-releasing areas. Dog runs, feed lots and chicken pens: Spray with 1 pint of Actina mixed with 1 gallon of water (covers 20' x 50' area; 1,000 sq. ft.).

WARRANTY: Medina Agriculture Products Co., Inc. makes no warranty, expressed or implied, including the warranties of merchantability and/or fitness for any particular purposes concerning this product, except those which are contained on the Medina Agriculture Products Co., Inc. label attached to the product container.

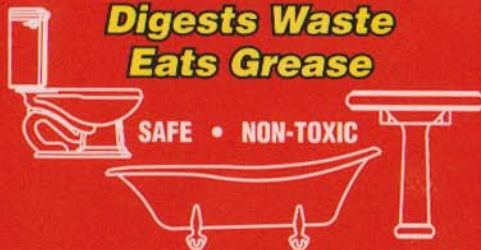

Actina®

SEPTIC TANK ACTIVATOR

HELPS PREVENT CLOGGING AND ODORS

Reduces Odors
Digests Waste
Eats Grease

ONE GALLON (3.785L) NET WEIGHT 8.44 LBS. (3.83Kg)

ACTINA increases the natural biological activity of microbes present in sewage. It contains biological activators derived from a fermentation process. This increase in the activity and numbers of organisms can help speed up the digestion of wastes, and release enzymes that break down grease and other complex wastes. Because these wastes are more completely digested the need for cleaning and pumping are greatly reduced, and so are odors.

Write to Medina for information about treating waste from commercial and municipal facilities, and farm animal waste treatment.
